

## Garston Forge

The blacksmith works in the forge and makes anything out of **metal**.

Name three objects in the forge that the blacksmith made:

1. **horseshoes**
2. **tyres on the wheels**
3. **branding irons**

Draw one of the objects below:

E.g, hearth, anvil, horseshoe, wheel

The blacksmith heats the metal in the fire and moulds it with his tools on the anvil. When the metal is the right shape he cools it down in a quenching trough of cold water.

Tick here  when you have seen the:
