

Henton Mission Room

This mission room was prefabricated by **Boulton** and Paul in 1886.

Tick here when you have seen the Boulton and Paul label.

There is a low brick **plinth** around the bottom of the mission room, that protects the wood and **corrugated** iron from groundwater.

Tick here when you have seen the low brick plinth.

Draw part of the mission room or an object inside the building below:

E.g. altar, harmonium, bier, window shapes, etc.
