

Iron Age House

The Celts lived in houses like this 2000 years ago. There is one room, but it has different uses. One use is as a kitchen.

The Celts made bread, first they had to grind the corn with the quern and then they cooked it in the oven

Tick here when you have seen the quern and the oven.

The Celts also cooked over a **fire** in a big cauldron. The fire also kept the house **warm**.

When it gets dark they would have lit **candles** to light the house.

Draw part of the Iron Age House or an object inside the house below:
